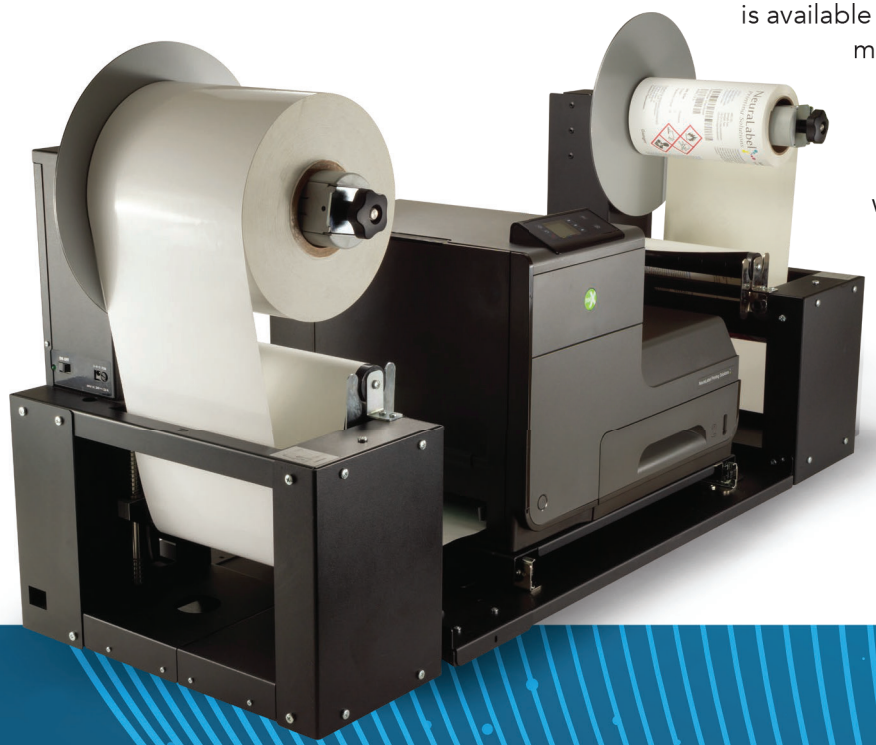
The 300x Ultra allows you to generate the largest print runs on a single media roll.



Volume and Speed

The NeuraLabel 300x Ultra has been designed to handle unconverted or die-cut rolls of label media, printing at speeds up to 20 ips.

The 300x Ultra prints stunning, full-color labels as narrow as six inches and as wide as 8.5 inches. Whether you need brilliant color or compliant GHS labels, a wide range of media is available from the industry's leading manufacturers to print the perfect label for your products.

Quickly print and process thousands of custom labels without the need to outsource, reducing time to market. The 300x Ultra performs well as a label press for consumer goods, producing stunning color that leads customers to action.

The Ultimate Labeling System

The 300x Ultra's high capacity is suited to be part of a larger label creation production facility that includes any of our finishing systems. For example, when paired with our Scorpio Finisher, you can create laminated, die-cut shapes in one convenient workflow.

Specifications
