NeuraLabel Sirius

Full-Color Toner Label Printer with White Toner Capability

The new NeuraLabel Sirius is a revolutionary label printer with white toner capability that gives you more creative options to attract attention and lead customers to action.

The Sirius is the most advanced full-color label printer with the added capability of printing white. Having white toner at your disposal gives you many more creative options to make the perfect label. Now you can utilize so many more media color options beyond just white. From black vellums, clear polyesters, naturals krafts, metallic and neon papers, synthetics, and many traditional medias, you now have a perfect solution to make your products stand apart from the competition.

The Sirius is perfectly suited for those who need a durable solution to produce labels in-house while keeping costs low. In addition, the Sirius offers the most flexibility to give your products the most impact to customers. With an integrated cutter feature, our Sirius printer gives you the ability to generate one single label or thousands cut into any length you require.

Labels produced with the NeuraLabel Sirius also have the capability to withstand water immersion without degradation to the image. In addition, our labels offer UV resistance to fading giving your eye-catching labels longevity in direct sunlight.

As with all NeuraLabel products, we have engineered the Sirius to operate in the smallest locations so you do not have to sacrifice your precious workspace. In addition, you can operate the Sirius with many available software titles on any Windows-based PC. Combined with our printing software, you can easily begin printing custom labels with your new Sirius label printer in just a few quick seconds.

Why Print with White?

Typical white media allows the colors that are applied to remain bright and vibrant. However, once you introduce media with any color, those colors will dull and lose their impact. Having the capability to apply white beneath the exact areas you want to apply color allows you to retain dramatic color on dark medias.

When using dark, transparent or colored media, The NeuraLabel Sirius brings the power of white toner into your creative vision. In addition to applying a layer of white beneath your color areas, you can even add white as design element to expand your creative options.
